USD 31.2–33.4B

Projected 2025–2026 (CAGR 6.9%)

EzeAd Growth Story: Why It Matters to Investors

EzeAd is the fastest-growing global classifieds and online auction platform, connecting buyers and sellers across international markets and local neighborhoods. Its innovative regional structure, free unlimited listings, and secure infrastructure make it attractive to both users and investors.

Global Reach

Projected market of USD 33.4B by 2026

Diversified Ecosystem

Auctions, ecommerce, blogs, jobs, hosting

Revenue Opportunities

Ads, premium listings, hosting, profit sharing

Advanced Technology

Secure, scalable, user-friendly platform

Why Invest in EzeAd

Equity Growth

Own a rapidly growing digital platform

Passive Income

Profits from auctions, advertising, and hosting

Market Diversification

Exposure across classifieds, blogs, and ecommerce

Brand Leverage

Associate with a well-known, growing brand

Expansion Opportunities

Regional expansions and child site development

EzeAd Services & Child Sites

A diversified ecosystem designed to reduce risk while increasing revenue.

Eze Auction

Buy and sell items online at competitive prices

Eze Blogs

Marketing content, product guides, and community articles

Eze Community

Social space for buyers, sellers, and enthusiasts

Eze Email

Email services for business and individuals

Hosting

Web hosting, domain registration, and server solutions

Work

Job portal connecting employers and potential employees

Projected 2026

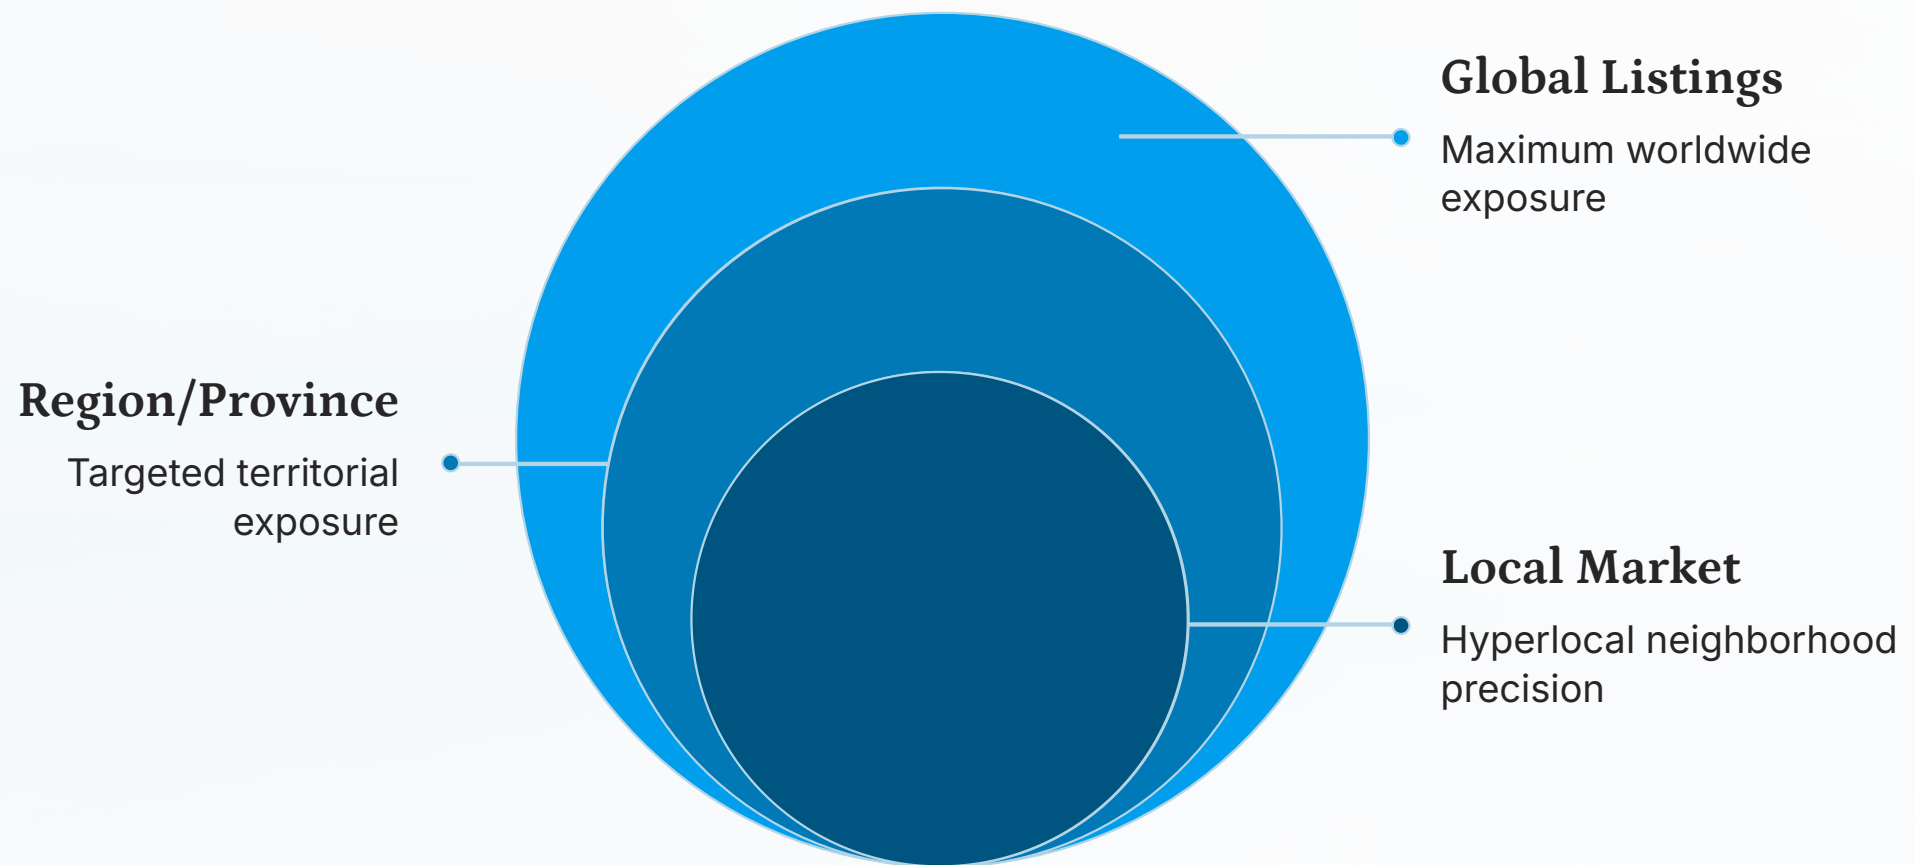

Growth Drivers

- Internet and smartphone penetration increasing
- Digital advertising replacing print media
- Demand for localized, user-friendly platforms

 **Investor Takeaway:** Online classifieds are booming. EzeAd is positioned to capture a large share of this growing industry.

Local to Global: EzeAd's Hierarchical Structure

EzeAd's global-to-local architecture allows users seamless navigation from worldwide listings to neighborhood engagement.

EzeAd has a fully-structured business model ready to expand immediately. The hierarchical segmentation ensures strong engagement at both local and global levels.

Multiple Monetization Streams

→ Freemium Model

Unlimited free listings + premium paid placements

→ AI-Driven Targeted Ads

Regional ad placements

→ Premium Memberships

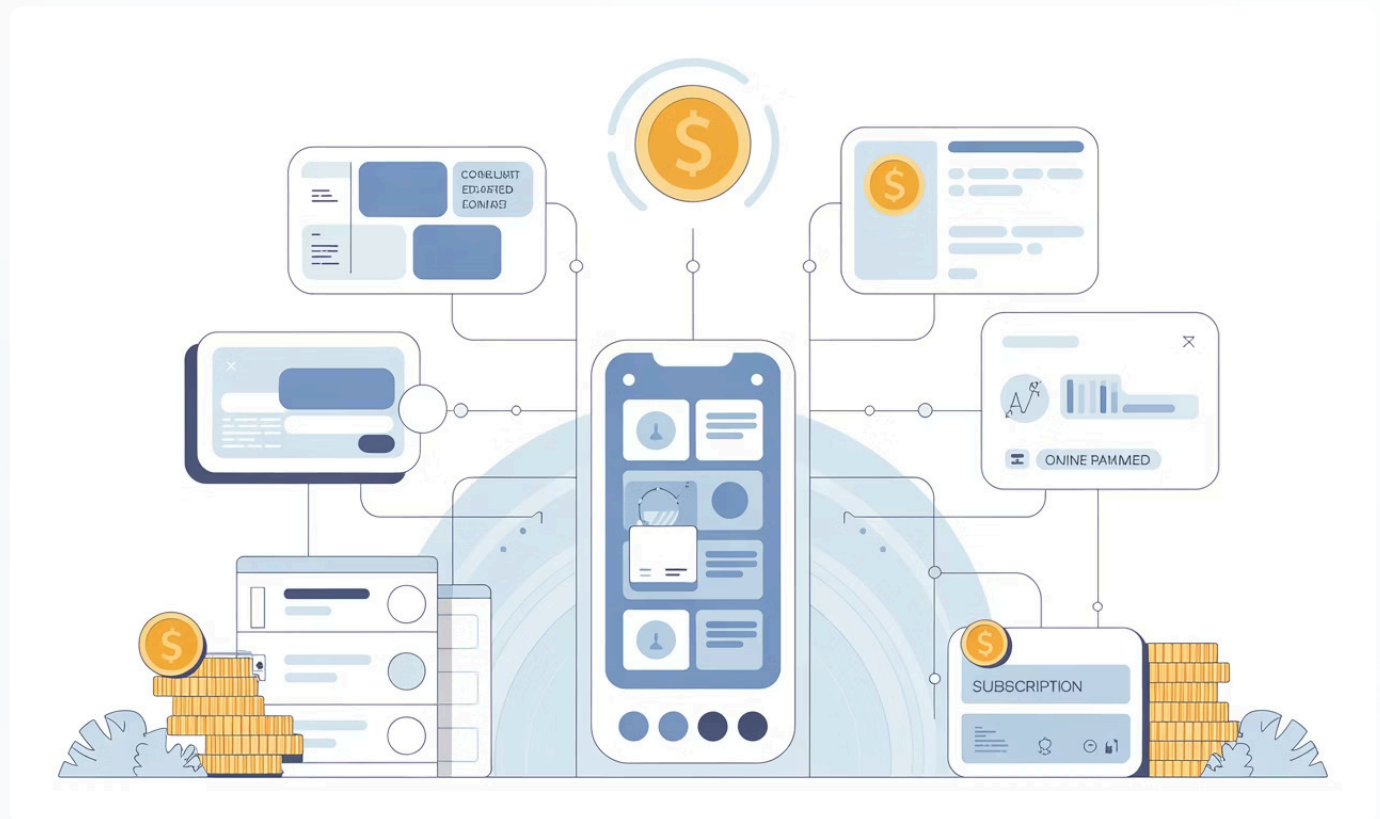

Enhanced seller visibility
subscriptions

→ Transaction Commissions

Earnings from high-value
auctions and escrow

→ Business Partnerships

Brand advertising and business
listings

Platform Readiness: Scalable Technology & AI Chatbot

Scalable by Design

- Cloud-based, globally accessible architecture
- AI-driven search, suggestions, and moderation
- Multi-currency and multi-language support
- Mobile-optimized with real-time analytics
- API integration and secure transactions

EzeAd AI Chatbot

An intelligent virtual assistant providing instant guidance on posting ads, finding listings, and exploring advertising opportunities — powered by advanced natural language processing.

- 📄 **Global, Free & Frictionless:** No credit card required. Ads can remain active up to 360 days.

INVESTOR DECK

EzeAD

AI-Enabled Global Commerce Infrastructure

4 Years Built · Live Platform · Ready for Commercial Activation

A fully built, multi-category marketplace ecosystem integrating classifieds, auctions, services, jobs, and business promotion — powered by AI, ready to scale globally.

Why Invest in EzeAD

De-Risked Platform

4+ years of development — live marketplace and mobile apps already operational.

Category-Defining

Classifieds, services, jobs, auctions, and business tools in one scalable ecosystem.

AI Growth Engine

Optimizing listing quality, visibility, and conversion at scale.

Multiple Revenue Layers

Subscriptions, featured visibility, lead generation, and transaction-based revenue — ready to activate.

The opportunity is not to build EzeAD — it's to activate, commercialize, and scale it.

PLATFORM

What EzeAD Is

A unified, AI-powered marketplace infrastructure replacing fragmented platforms with one scalable ecosystem.

Listings

Buy & sell products locally and globally.

Auctions

Dynamic price discovery and competitive selling.

Services

Connect service providers with real demand.

Jobs

Hiring and opportunity marketplace.

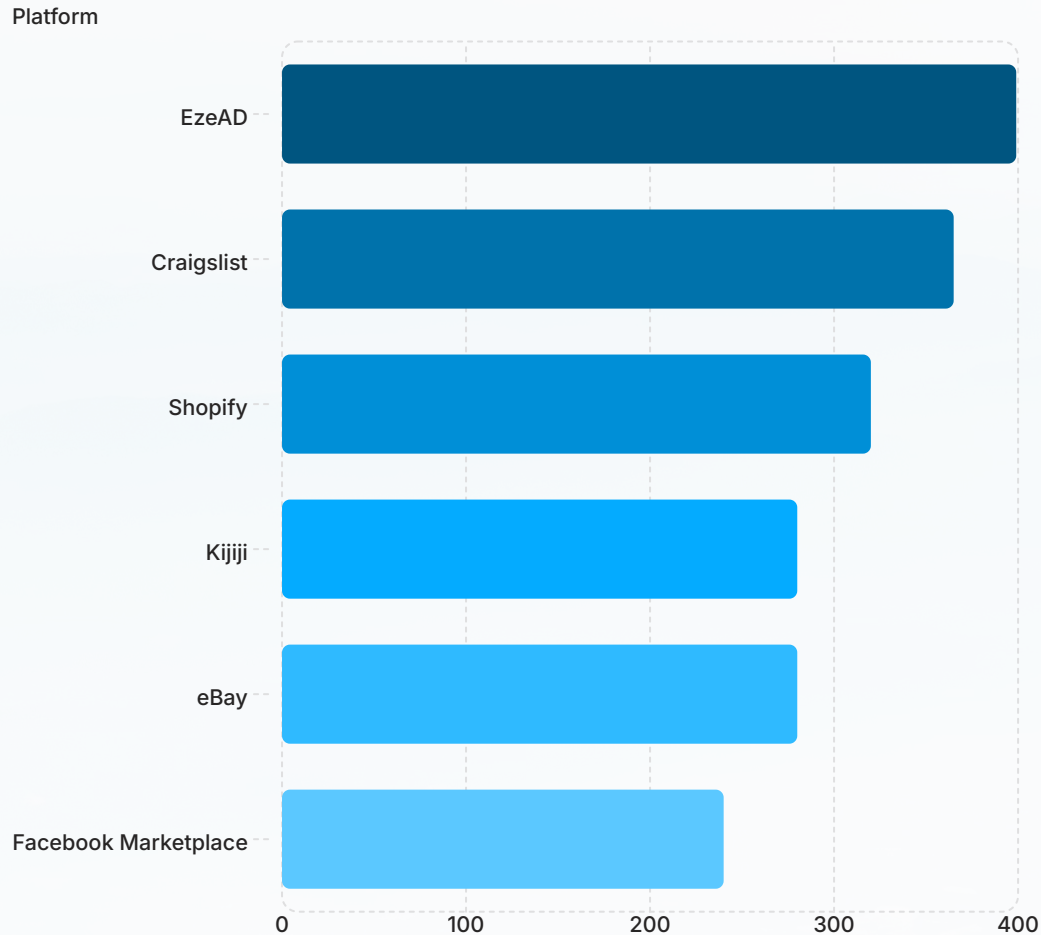

Business Pages

Digital presence and promotion for businesses.

PERFORMANCE ADVANTAGE

Industry-Leading Platform Speed

~399 / 400 — Near Perfect

EzeAD outperforms eBay, Shopify, and Facebook Marketplace by **20–40% in infrastructure efficiency**, verified by Google PageSpeed Insights.

- Performance: **99/100**
- Accessibility: **100/100**
- Best Practices: **100/100**
- SEO: **100/100**

Faster load times directly improve engagement, conversion, and retention — while reducing operational costs.

Global Marketplaces Are Proven — But Broken

Fragmented Experience

No single platform supports buying, selling, services, jobs, and promotion together.

Trust & Safety Breakdown

Scams, weak verification, and poor moderation plague Facebook Marketplace, Craigslist, and Kijiji.

Monetization Misalignment

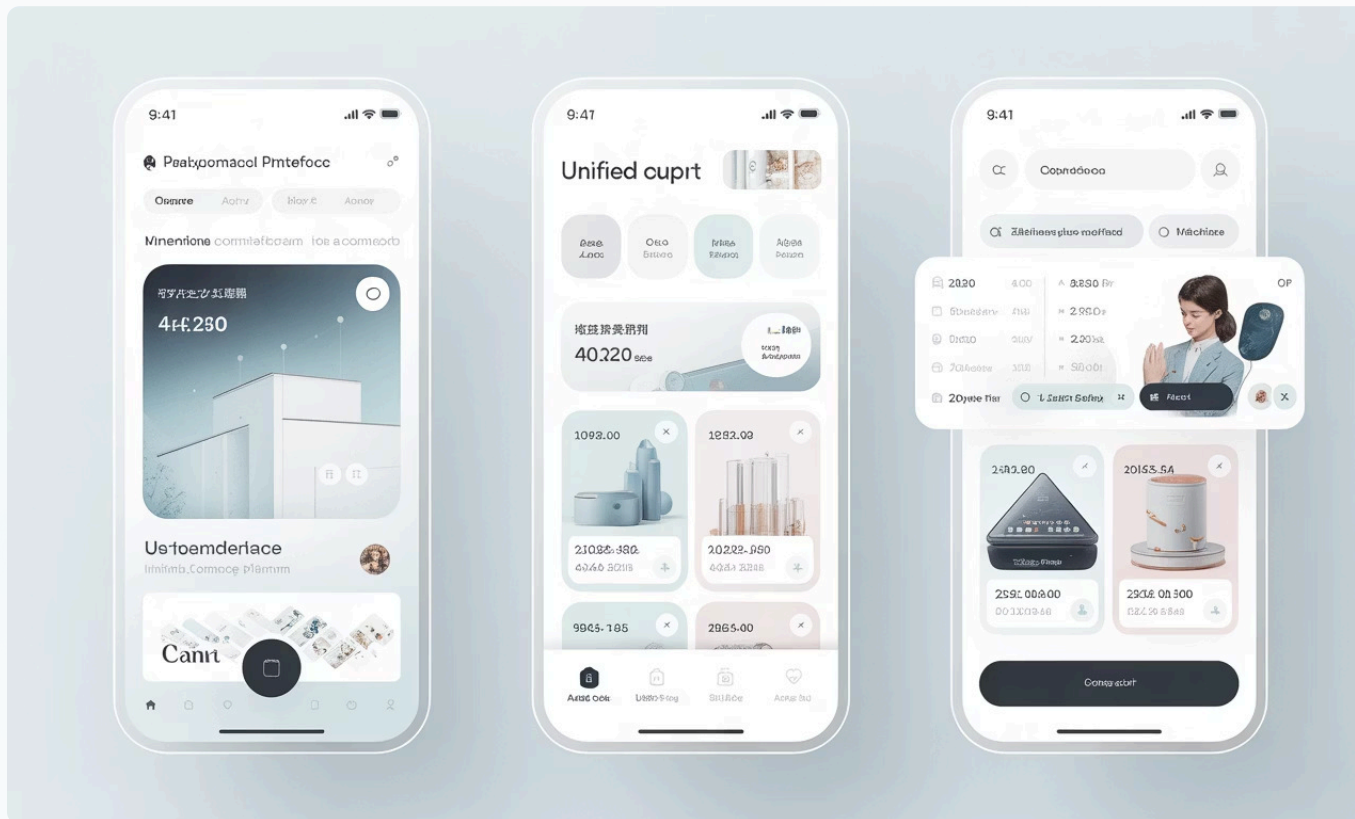

Rising fees and pay-to-play visibility — platforms profit while users lose value.

Poor UX & Complexity

eBay and Shopify burden users with complex workflows and outdated interfaces.

The EzeAD Solution

→ All-in-One Commerce

Listings, services, jobs, auctions, and business promotion — one integrated platform.

→ Trust-First Infrastructure

Built-in verification, moderation, and transparent interactions.

→ AI-Powered Performance

Enhances listing quality, visibility, and conversion rates.

→ Value-Aligned Monetization

Free entry → frictionless growth. Revenue through value-driven upgrades, not forced paywalls.

A Multi-Layer Marketplace Ecosystem

Core Marketplace

Classifieds, auctions, services, jobs, and business promotion.

Growth Layer

Real-time messaging, user interaction tools, and iOS & Android apps.

AI Performance

Listing optimization, smart search, and performance-driven exposure.

Monetization

Featured listings, business subscriptions, lead generation, and future transaction fees.

- Each layer strengthens network effects, retention, and monetization — users complete entire commerce journeys within one platform.

Three-Phase Monetization Strategy

1

Phase 1 — Validate

Featured listings, business accounts, and lead generation. Freemium entry drives rapid adoption.

2

Phase 2 — Scale

Advanced subscriptions, dealer plans, and sponsored placement. Recurring revenue foundation.

3

Phase 3 — Expand

Transaction fees, payment processing, and SaaS business tools. Full commerce infrastructure.

Revenue scales naturally with marketplace activity — the more the platform is used, the more it earns.

12–24 Month Roadmap

0–3 Months

Launch acceleration, user onboarding, and initial monetization activation.

6–12 Months

Scale recurring revenue, optimize lead generation, and expand user acquisition.

1

2

3

4

3–6 Months

Expand seller base, introduce business accounts, and grow listing volume.

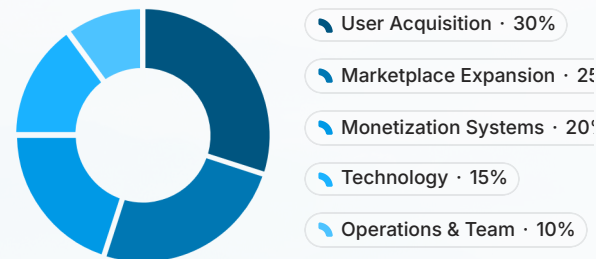

12–24 Months

Enter new markets, launch transaction and payment layers, achieve market leadership.

Capital Allocation & The Opportunity

18–24 Month Runway

Capital accelerates a **fully built platform** into scalable growth — not product development.

- **30%** — User Acquisition & Growth Marketing
- **25%** — Marketplace Expansion & Supply
- **20%** — Monetization & Revenue Optimization
- **15%** — Technology & Infrastructure
- **10%** — Operations & Team

EzeAD is built. EzeAD is operational. EzeAD is ready. We are opening the next phase of growth — inviting strategic investors to be part of it.

EzeAD: A Movement, Not Just a Marketplace

A community-driven platform challenging corporate giants — built by and for everyday people. **Free to post. Global reach. People first.**

CROWDFUNDING CAMPAIGN

FULL LAUNCH: JULY 1, 2026

Meet the Visionaries Behind EzeAD

Frank and Carrol Rayner founded EzeAD to reclaim online commerce for everyday people. Frank first registered **ezead.com in 2003** — a dream finally realized. After COVID-19 forced them to retire from their demolition business, they faced a broken marketplace firsthand and built the solution the world needed.

"There has to be a better way." — Frank Rayner

A Modern-Day David vs. Goliath

Frank spent **3 years and hundreds of thousands of dollars** across major platforms — with devastating results:

- **Ritchie Bros:** \$200K in equipment → **\$800 in the red** after fees
- **Canada's largest classifieds:** \$8,000+/month, almost no sales
- **Other platforms:** \$18,000 in fees, 2 sales in 6 months

Corporate greed, poor promotion, and exorbitant fees — **EzeAD exists to change all of this.**

What Makes EzeAD Different

Global Reach

One "EZE" post reaches your neighborhood, city, country, and the world — 100+ countries supported.

Free to Post

No credit card required. No hidden fees. Free listings for everyone, always.

Privacy & Security

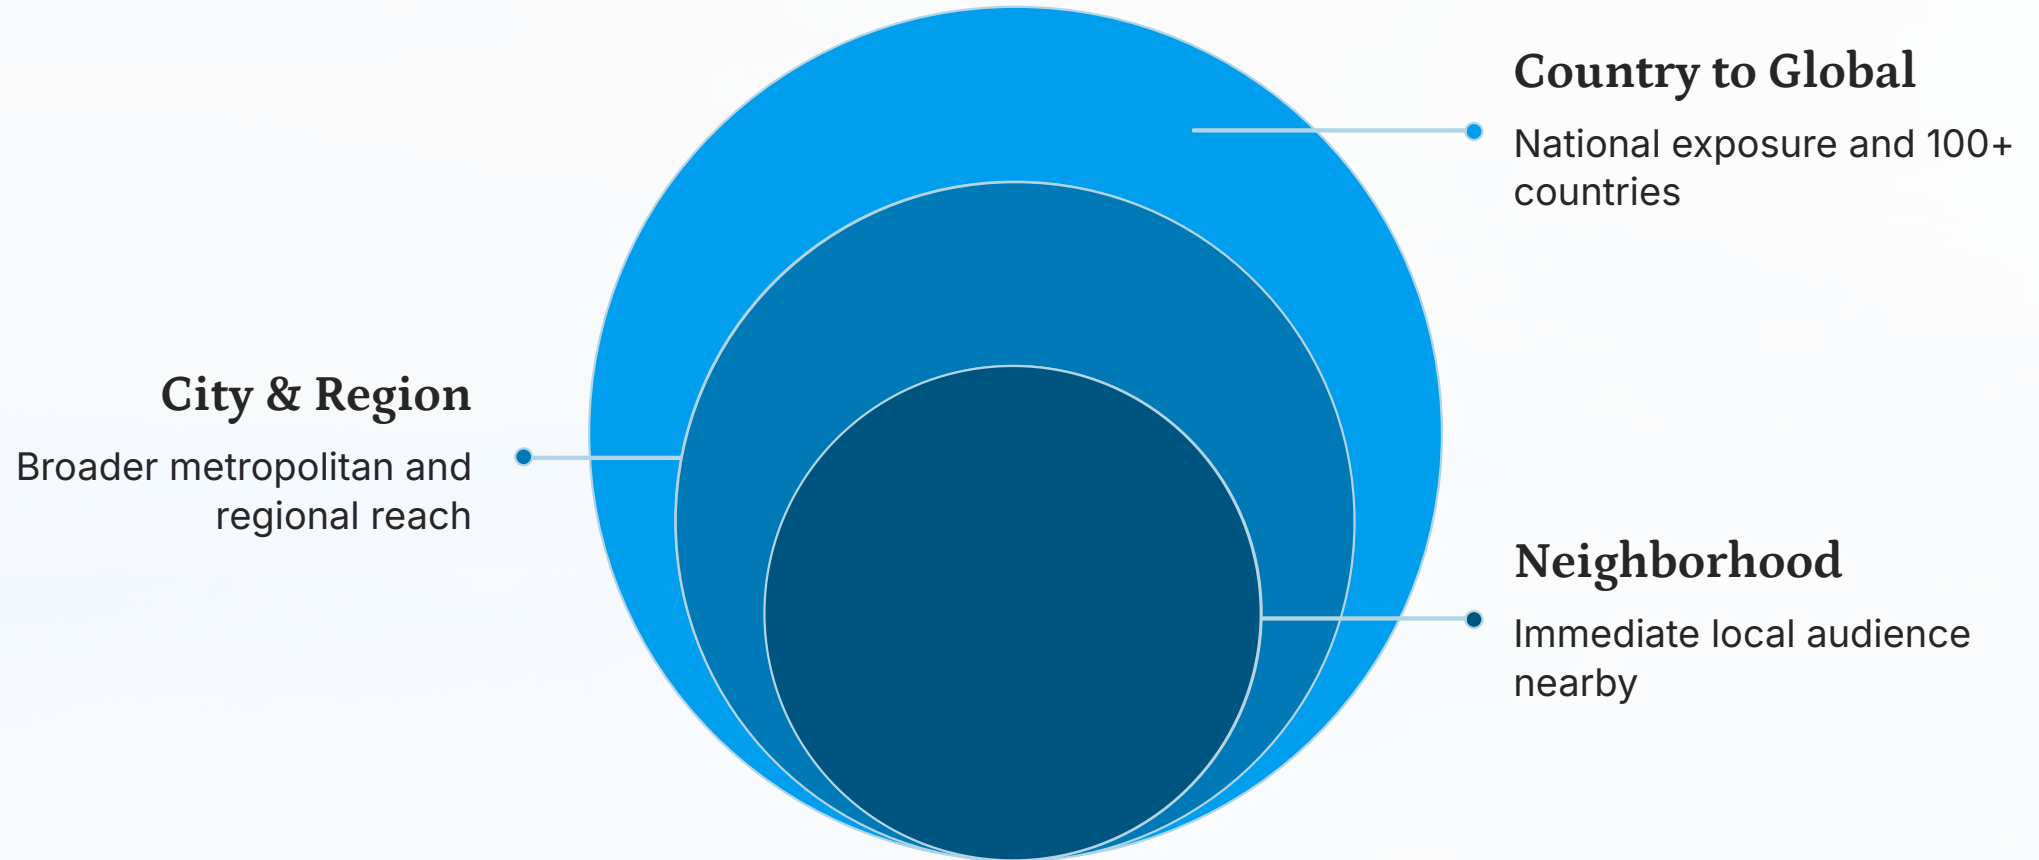

Hack-proof, DDoS-proof infrastructure. No credit card data collected — ever.

Community-Driven

Trust-based, ethical, and inclusive — putting people before profits.

One Post. Everywhere.

With a single "EZE" post, your listing reaches your neighborhood, city, region, country, and a global audience across 100+ countries — all at once. Over **2,000 categories** ensure your post stays visible without expensive promotions.

Built for Everyone

For Buyers

Advanced search filters, favorites tracking, reverse auctions, and a "Wanted" watch list with instant email notifications — no login required.

For Sellers

Up to 20 photos, videos, web links, HTML editor, messaging system, and SEO-friendly relisting — all free.

Accessibility

UserWay integration ensures ADA and WCAG 2.1/2.2 compliance — EzeAD is accessible to all users, including those with disabilities.

World-Class Infrastructure

Powered by Cloudflare & ScyllaDB

- **99.9% uptime** across 300+ cities worldwide
- Images, videos, and documents cached globally for minimal latency
- Hack-proof and DDoS-proof architecture
- ScyllaDB delivers millions of operations per second with single-digit millisecond latency
- Automatic traffic routing to the nearest, most responsive server

Built to scale to **hundreds of millions of listings and users.**

The Complete EzeAD Ecosystem

EzeAD is building the world's largest **human-powered digital ecosystem** with integrated child sites:

Eze Auction

Dedicated online auction platform

Eze Community

Forums, blogs, video chat rooms

Eze Jobs & Lancers

Job listings and freelance marketplace

Eze Stores

Online store builder for businesses

Ezeship.com

Advanced global shipping platform

Eze.Money

Community-based funding and leasing

Why Your Support Matters

EzeAD soft-launched on **August 15, 2024**. Full launch is planned for July 1, 2026. Your contribution helps us:

1 Expand Infrastructure

Support more users and listings with fast, reliable, secure performance.

2 Develop New Features

Advanced search, improved interfaces, and enhanced security tools.

3 Grow Globally

Connect more buyers and sellers across 100+ countries worldwide.

4 Strengthen Community

Foster a collaborative environment where members shape the platform's future.

Join the EzeAD Movement Today

Register is quick, simple, and **completely free** — **no credit card required**. Be part of something bigger. Help us build a fairer, more equitable online marketplace for everyone.

Register Now

Free account, no credit card needed

Post Your First Ad

Reach a global audience in minutes

Support Our Campaign

Every contribution brings us closer

 **EzeAD is available in 15+ languages** and supports users across Australia, Bermuda, Brazil, Canada, France, Italy, Mexico, the UK, the US, and 100+ countries worldwide.

EZAD — Full Build Cost & Strategic Value

An investor view: not what it cost to build, but what it would cost to **rebuild this from scratch today** — and how long it would take.

Investors Don't Ask What It Cost

Investors ask: **what would it cost to rebuild this from scratch today**, and how long would it take to achieve the same result?

- That is where the real leverage exists. Ezead is not a concept — it is fully built infrastructure entering scale.

SECTION 1

Platform Development

A full marketplace platform with scalable global architecture, including complete user systems (accounts, listings, messaging) and full administrative and backend control systems.

Core Platform

\$300K – \$1.2M

Backend Infrastructure

\$150K – \$500K

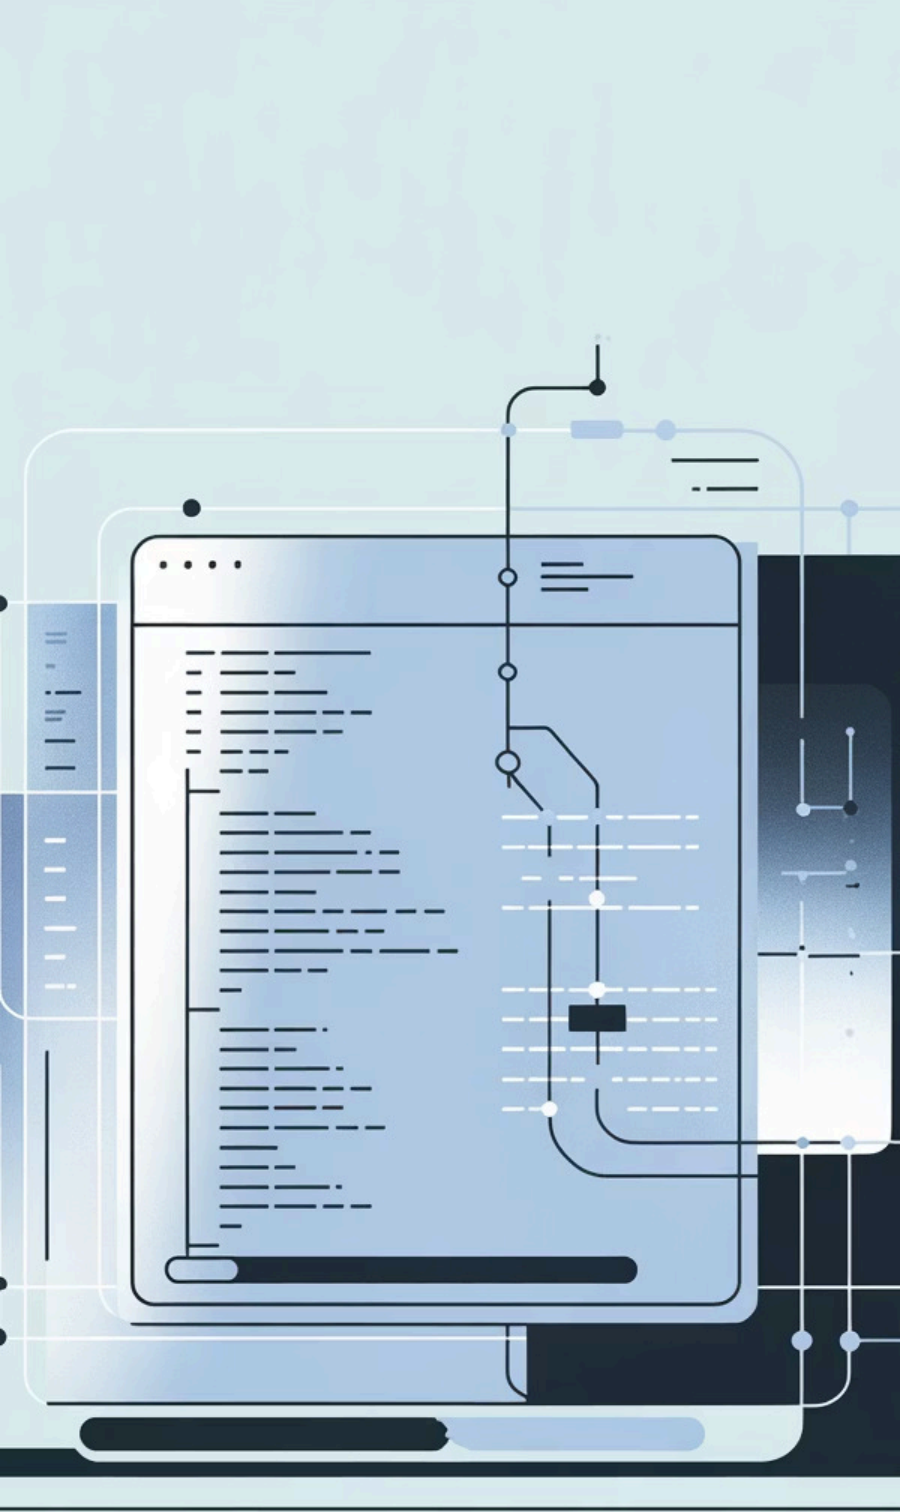

Database Architecture

\$75K – \$250K

Admin / Control Systems

\$75K – \$200K

Subtotal: \$600K – \$2.1M

SEO Infrastructure

Not traditional content creation — a **programmable SEO system** with global page architecture, an indexing engine, and structure already compatible with AI-driven search systems.

Subtotal: \$1.5M – \$5.5M

**Technical SEO
Architecture**

\$200K – \$750K

**Programmable SEO
System**

\$400K – \$1.5M

**Content & Data
Structuring**

\$250K – \$1M

**Crawl & Index
Optimization**

\$100K – \$300K

**Authority & Time
(4 Years)**

\$500K – \$2M

SECTION 3

Performance Engineering

The platform operates at an elite level of performance, which directly impacts crawl rate, indexing speed, rankings, and user engagement.

Core Web Vitals Optimization

\$75K – \$250K

Rendering & Load Optimization

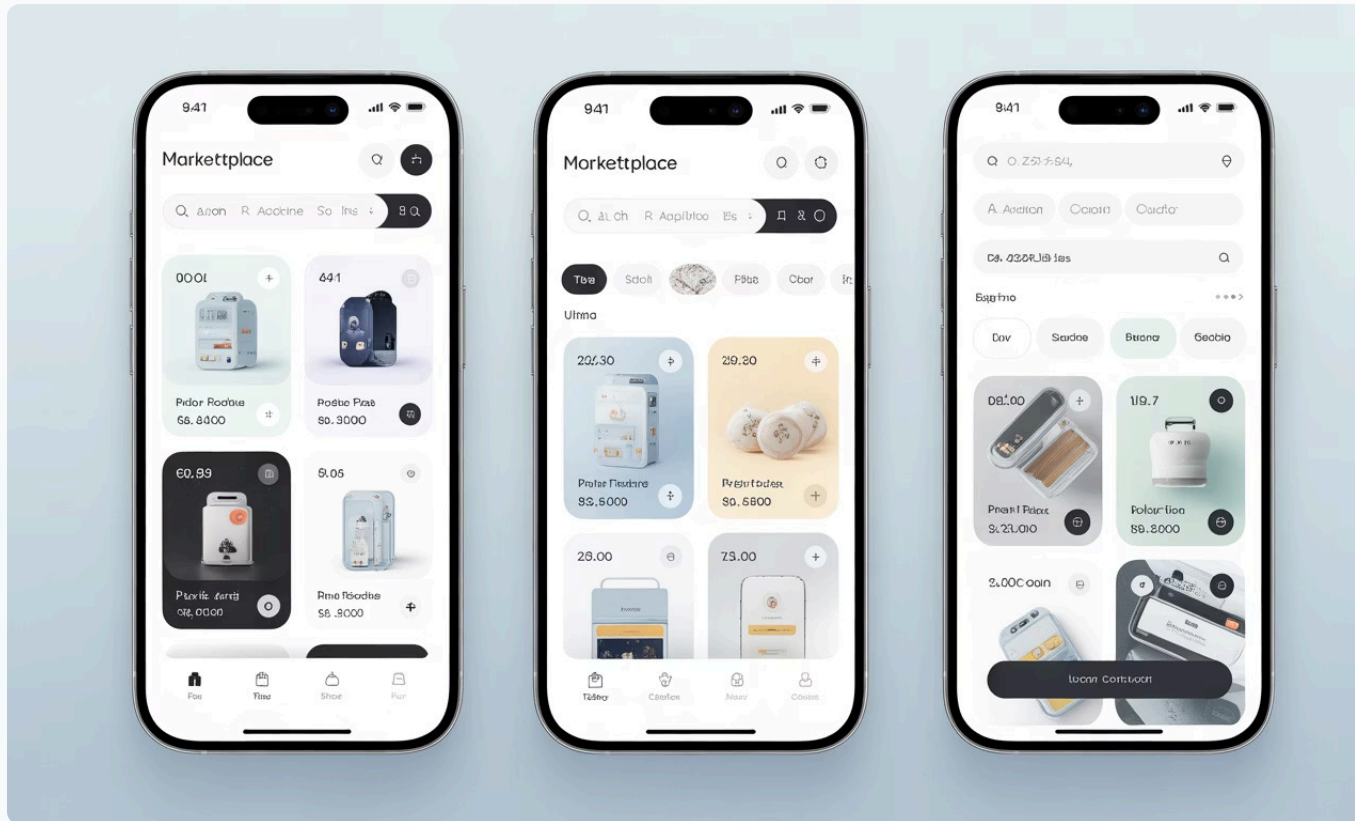

\$50K – \$150K

Infrastructure Tuning

\$50K – \$150K

Subtotal: \$175K – \$550K

Mobile Applications

Fully integrated mobile applications allowing users to access and interact with the marketplace seamlessly.

Subtotal: \$250K – \$750K

iOS Application

\$100K – \$300K

Android Application

\$100K – \$300K

API Integration

\$50K – \$150K

SECTION 5

Ecosystem: ezeadmedia.com & Child Sites

Supporting brand platform, satellite SEO ecosystems, and additional indexing layers that reinforce overall discoverability.

**Secondary Site
Development**

\$50K – \$200K

Content & Structure

\$50K – \$200K

Ecosystem Integration

\$25K – \$100K

Subtotal: \$125K – \$500K

Time Value

Four years invested in continuous iteration, indexing maturity, and architectural refinement. **This time component cannot be compressed, even with significant capital.**

4

Years Invested

Continuous iteration, indexing maturity, and architectural refinement

\$500K+

Equivalent Team Cost

\$500K – \$2M in equivalent team cost to replicate this execution

TOTAL REPLACEMENT COST

What It Would Cost to Rebuild Today

Conservative

\$3.1M – \$5M

Realistic

\$5M – \$9M

Strategic / Enterprise

\$8M – \$15M+

This includes time, indexing maturity, architecture, and AI readiness — that is why replacement value is significantly higher than typical build estimates.

Anticipated Investor Questions

Can this be rebuilt cheaper?

Not with the same indexing depth, performance, and AI positioning.

What is proprietary?

Structure, scale logic, indexing footprint, and time.

Why has no one else done this?

It requires long-term execution across engineering, SEO, and architecture — not just capital.

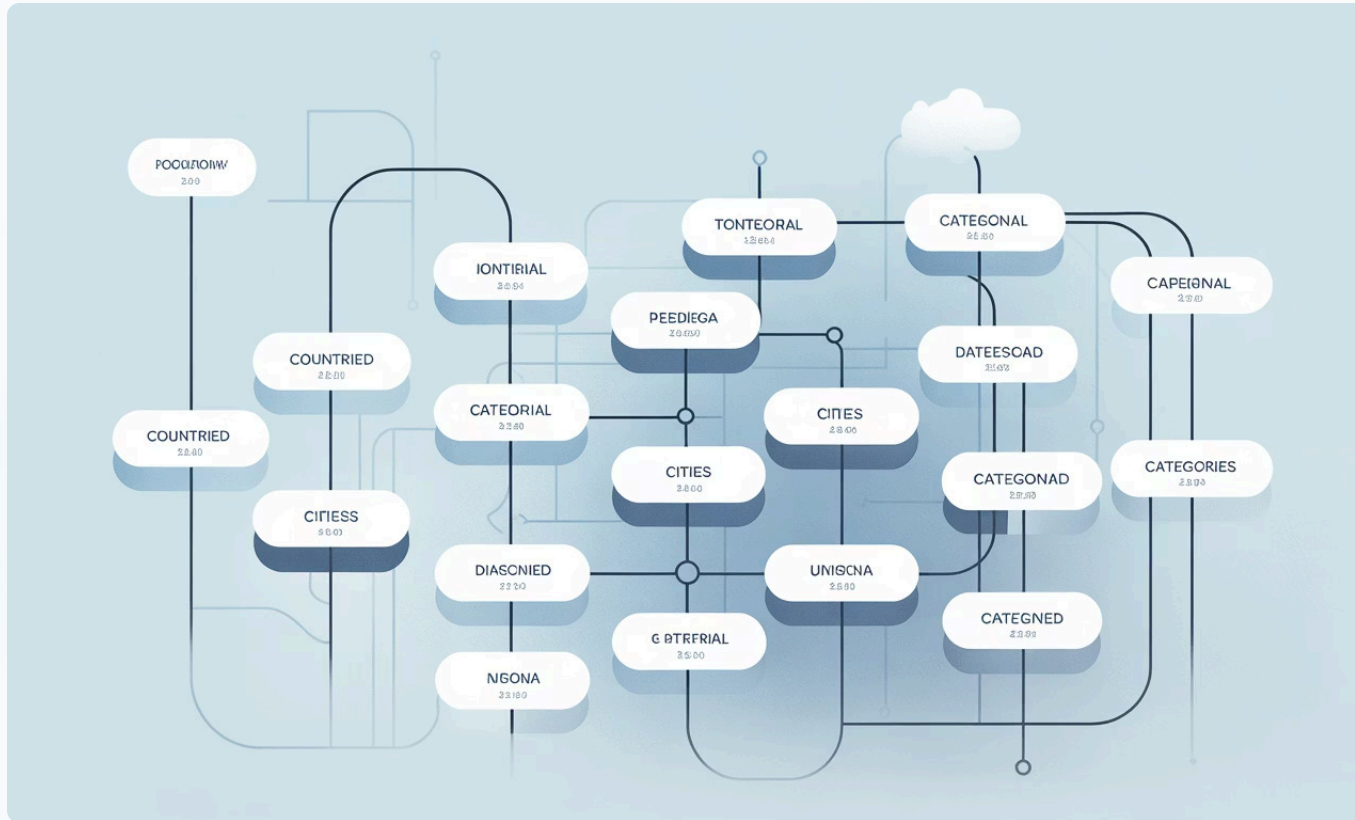

- ❑ **Ezead represents \$5M–\$9M+ in replacement cost and 3–5 years of development and indexing time.** This is not a concept — it is fully built infrastructure entering scale.

Ezead — Our SEO Moat & Structural Advantage

What we've built over four years isn't traditional SEO. It's a defensible, scalable search infrastructure that competitors cannot quickly replicate.

Structural Architecture

We didn't approach SEO as content creation — we built a **scalable global architecture**. Our platform is structured across:

This tells search engines that Ezead is not a single source of information — but a **complete system** systematically covering entire markets rather than individual keywords.

→ Countries & Regions

→ Cities & Categories

→ Individual Listings

TECHNICAL EDGE

Technical Performance & Crawl Efficiency

Speed

Engineered for maximum performance — search engines index more pages, faster.

Crawlability

Optimized architecture allows reliable, efficient crawling at scale.

Rankings Impact

Directly improves discoverability, rankings, and user experience.

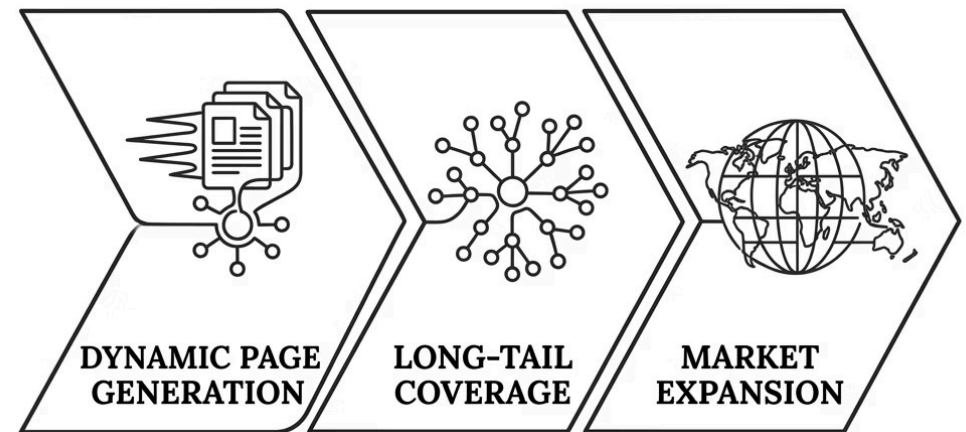

Our performance metrics are at the highest tier, which allows search engines to index more pages, faster, and with greater reliability —

SCALE

Programmatic SEO at Scale

We built systems that **generate and organize pages dynamically** — scaling across markets and long-tail search without relying on manual content creation.

- ❏ We are not competing page-by-page. We are capturing **entire search surfaces**.

FUTURE-READY

AI Search Readiness

Structure & Data Organization

Our architecture, speed, and data organization make Ezead highly compatible with AI-driven search systems.

Already Being Surfaced

Ezead is already appearing within emerging AI discovery environments.

Market Position

We are positioned ahead of the market shift from traditional search to AI-based results.

Time-Based Advantage

Over the past **four years**, we have built consistent indexing history, crawl patterns, and domain trust.

- ❏ This is not something that can be replicated quickly — **even with significant capital**. Time is a critical component of our moat.

Indexing History

Consistent crawl patterns built over time.

Domain Trust

Established authority that compounds with age.

GLOBAL REACH

Market Coverage

Our platform is designed to cover **all geographies and categories simultaneously** — positioning Ezead as a complete marketplace infrastructure rather than a niche player.

All Geographies

Countries, regions, and cities covered systematically.

All Categories

Full category depth across every market.

Complete Infrastructure

Not a niche player — a global marketplace system.

What We've Built Is Search Infrastructure

Structural Architecture

Global, scalable search infrastructure

Technical Performance

Speed, crawl efficiency, AI-ready systems

Time & Trust

Years of indexing history and authority

These three pillars — structural architecture, technical performance, and time-based trust — combine to form a defensible moat that cannot be quickly replicated.

4

Years Built

Consistent indexing history and domain trust.

∞

Search Surfaces

Entire markets captured, not individual keywords.

\$M+

To Replicate

Millions in investment with no guarantee

Ezead Is Already Operating in the Future of Search

What we have built is not traditional SEO — it is **search infrastructure**. Replicating this would require multiple years and millions in investment, with no guarantee of achieving the same depth of indexing or AI visibility.

Not Preparing for the Future

We are already operating within it.

A Real, Defensible Moat

Structural, technical, and temporal advantages that compound over time.

Ezead

Global Marketplace Infrastructure

A founder's perspective on why it exists, what was built, and why it matters.

The Problem With Existing Marketplaces

The problem wasn't that marketplaces didn't exist — it was that they all operated on the same outdated model. Classifieds, auctions, and platforms were **fragmented**, not built to scale globally, and unable to integrate across local and global commerce. This creates inefficiency, limits visibility, and restricts growth for buyers and sellers.

The Realization

Duplication Doesn't Win

The market does not reward duplication — it rewards **differentiation at a structural level**. Building another version of an existing platform would not create a competitive advantage.

Reframing the Problem

Instead of building a website, I needed to build **infrastructure**.

The Concept Behind Ezead

Global Infrastructure

Not a single platform — a system supporting auctions, classifieds, and structured listings across every geography and category.

Unified Framework

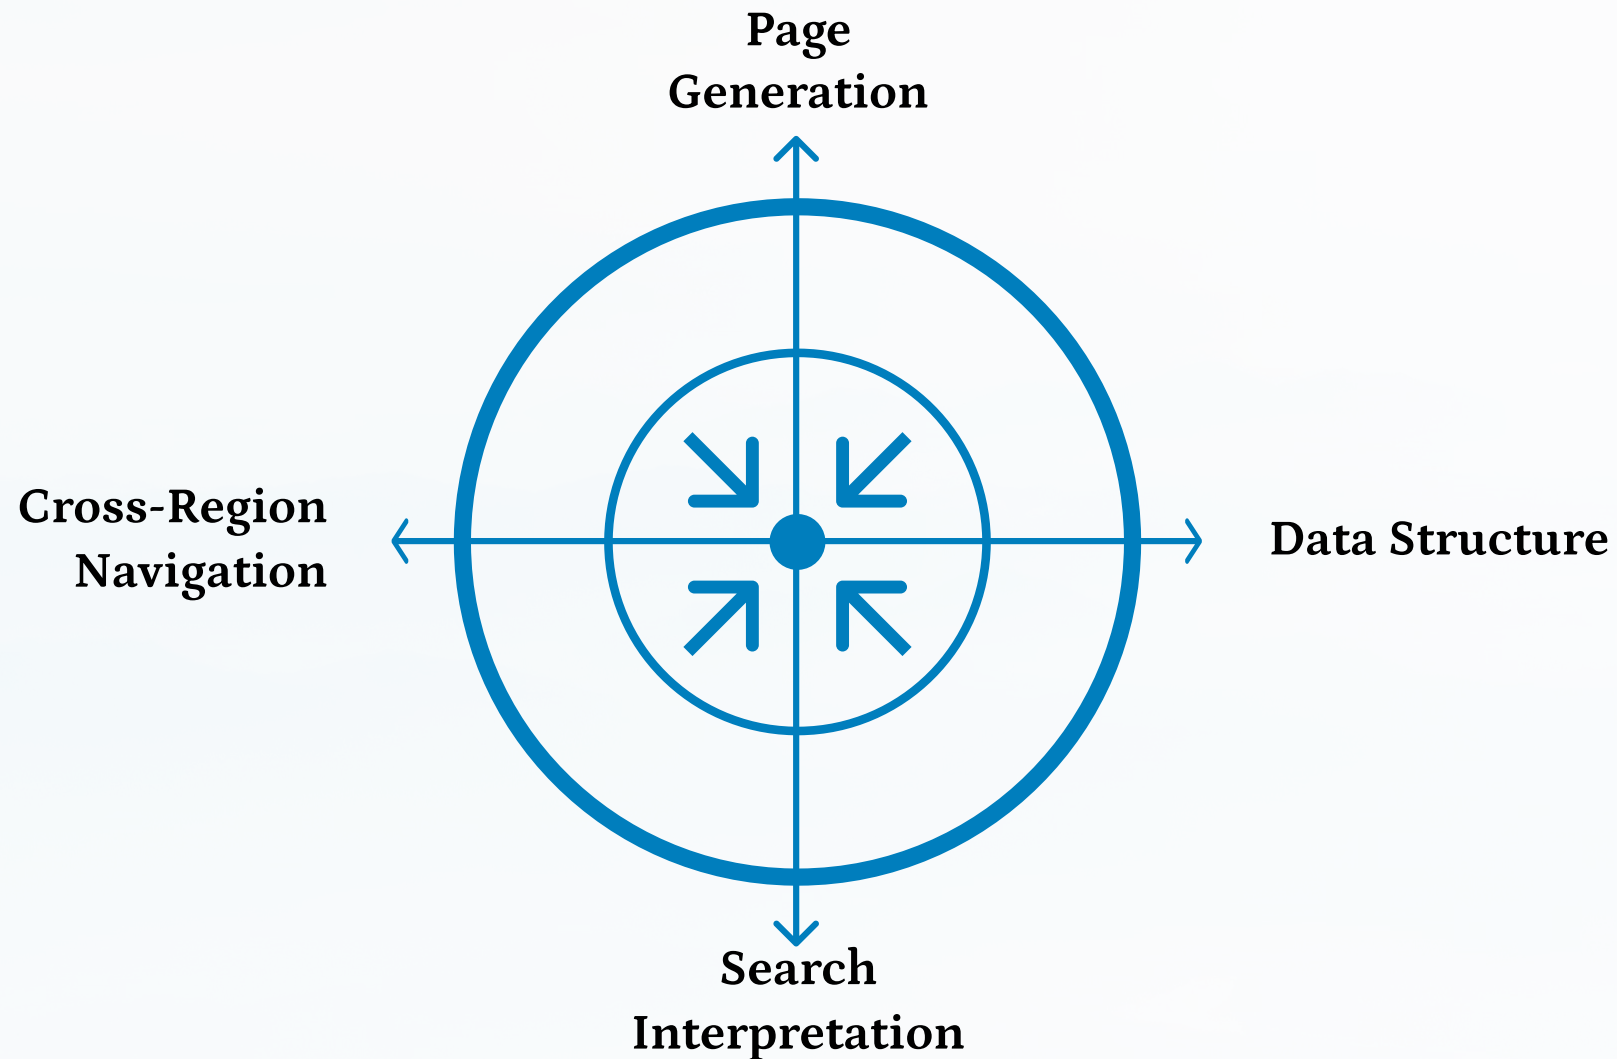

Fragmented systems unified into one scalable, logical architecture.

Built to Scale

Designed from the ground up to operate across local and global commerce seamlessly.

Building Architecture, Not Features

Ezead required a completely different approach to development — focused on **systems**, not features. This is what separates infrastructure from a typical application.

Each layer was engineered to work together as a unified system — how pages are generated, how data is structured, how search engines interpret the platform, and how users navigate across regions and categories.

Why It Took Four Years

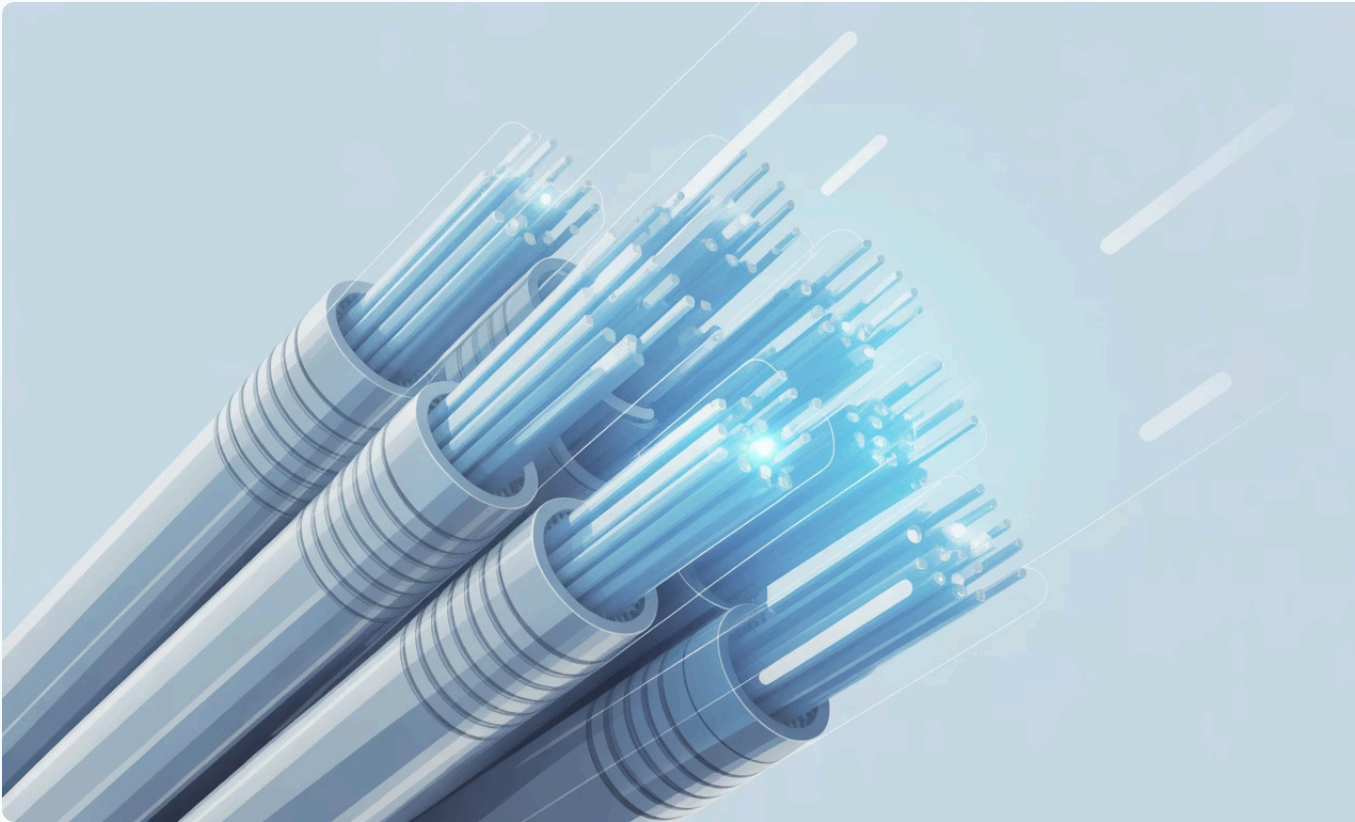

Development & Refinement

True scalability requires time — time for development and time for refinement. This was not something that could be rushed.

Indexing & Trust

Critically, time for indexing and trust to build. The four years invested represent not just development, but **maturity of the system.**

SEO & Performance as Infrastructure

SEO Built Into the Foundation

SEO was not treated as a marketing function — it was built into the foundation through structure, performance, and scalability. This created a system that is **inherently discoverable** rather than artificially promoted.

Performance is Critical

Performance is not cosmetic — it is critical to how search engines and users interact with a platform. Ezead was engineered to operate at a high-performance level, enabling faster indexing, better rankings, and improved user experience.

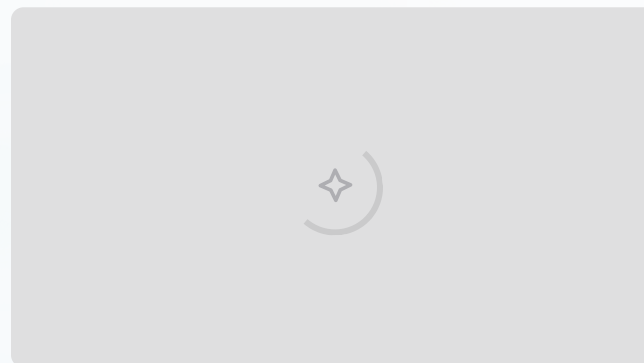

AI Search & The Moat

Aligned With AI Search

As search evolves toward AI-driven systems, structure and clarity become even more important. Ezead is already aligned with this shift because of how it was built — positioning it **ahead of platforms now trying to adapt.**

A Durable Barrier

What exists today is a combination of architecture, time, indexing, and performance — a barrier not easily replicated. Even with capital, rebuilding this would require **years of execution.**

The Value & Where Ezead Is Today

4

Years Invested

Development, refinement, and indexing maturity.

\$M+

Replacement Cost

Millions in capital and multiple years required to rebuild.

1

Operational Platform

Fully built and positioned for growth — not a concept.

From an investor perspective, the key question is replacement cost. Rebuilding Ezead would require millions in capital and multiple years of development — including platform engineering, SEO infrastructure, performance optimization, mobile integration, and indexing maturity. **Ezead is not in the concept phase — it is fully built and operational.**

The Opportunity Ahead

Scale Phase

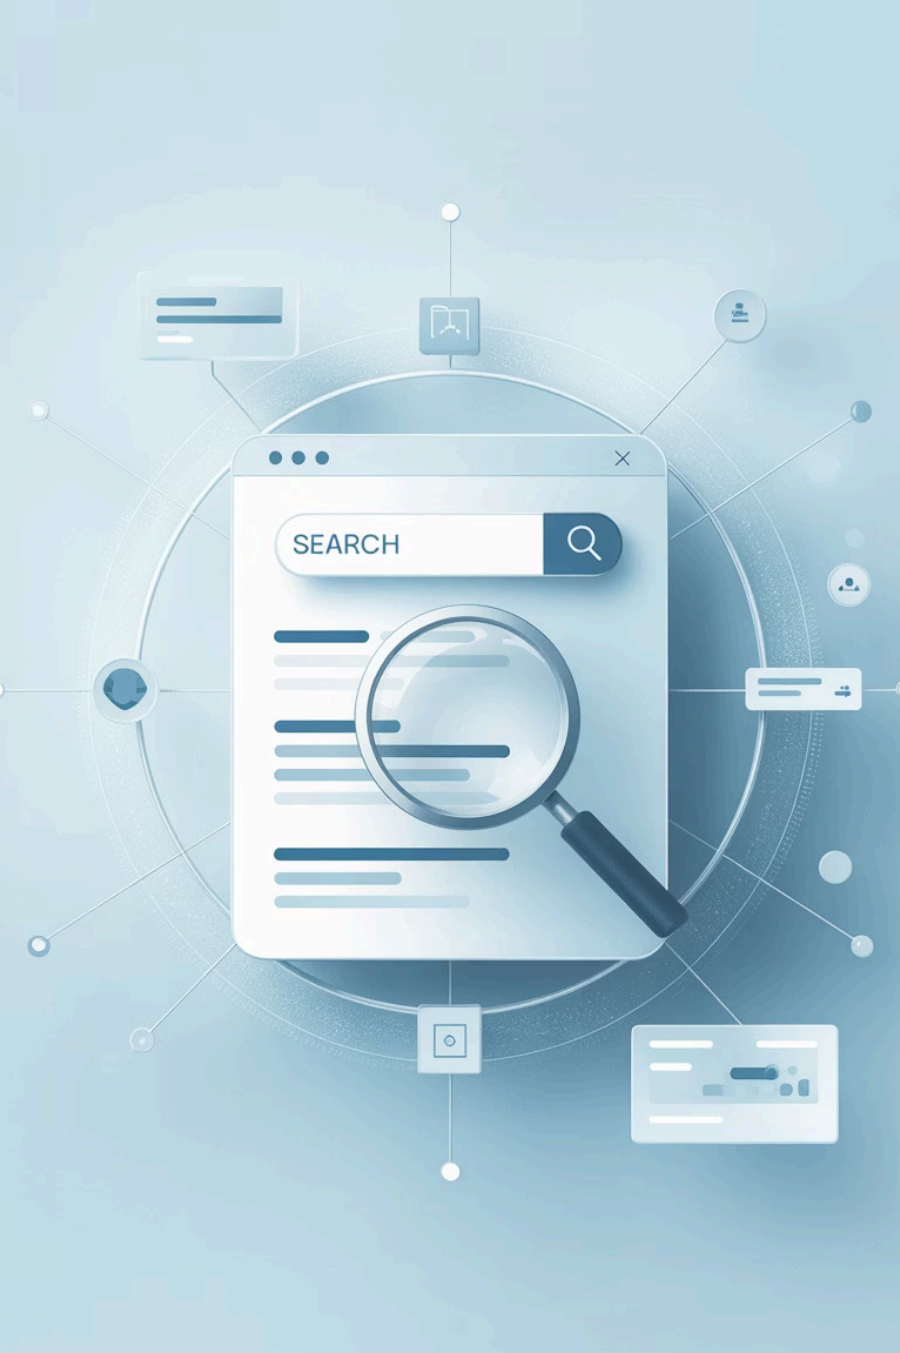

The next phase is activation — expanding across markets, increasing user adoption, and leveraging existing infrastructure. This is where capital creates **acceleration rather than construction**.

The Opportunity

The opportunity is not to build something new — it is to **scale something that already exists**. This significantly reduces risk and increases potential return.

- ❏ Ezead is positioned at the intersection of marketplace infrastructure and the future of search — **not catching up to the market, but ahead of where it's going.**

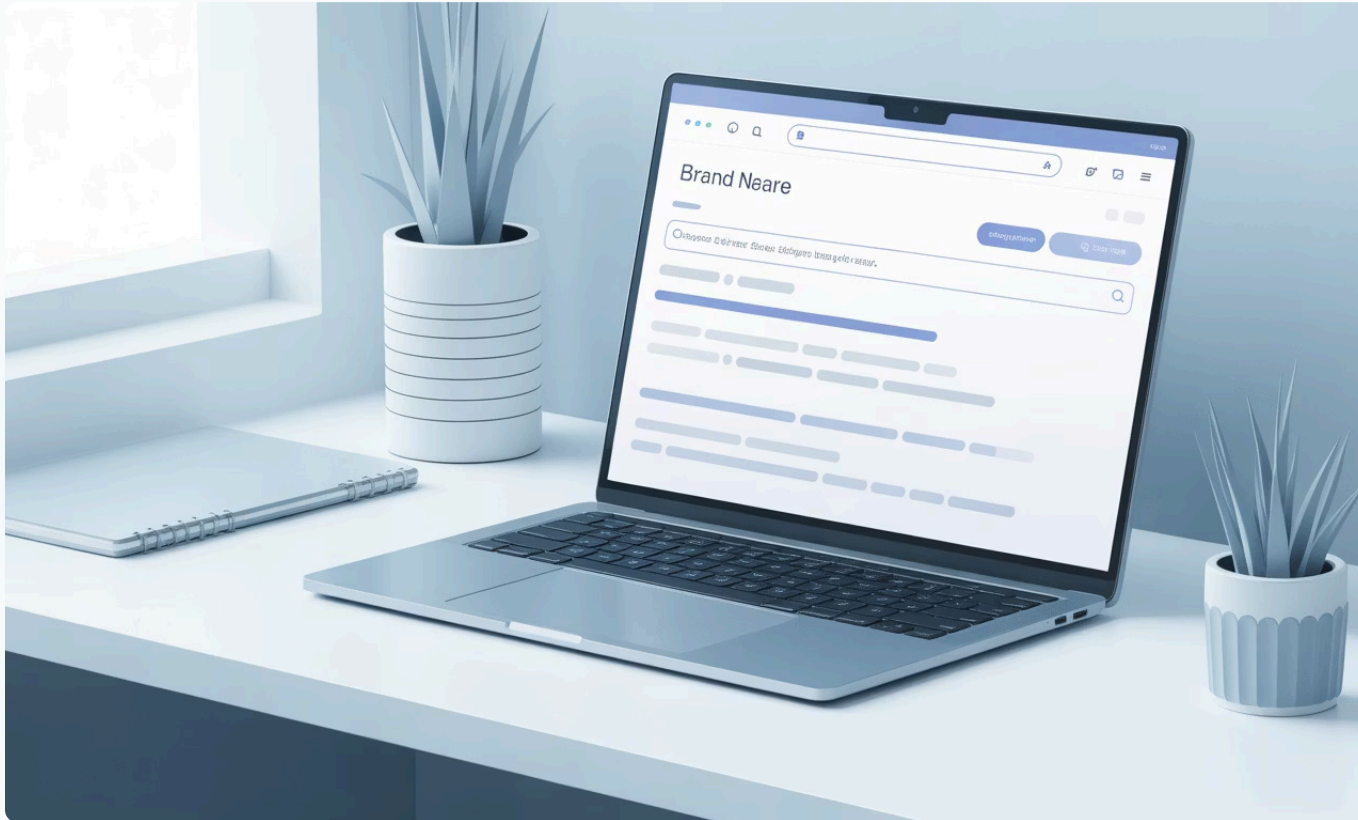

Ezead – Global Search & AI Indexing Validation

Ezead is fully indexed across both traditional Google Search and Google AI-driven search environments — confirming real-time discoverability and ranking presence worldwide.

Global Brand Search – "Ezead"

Google Search

Ezead is discoverable via standard Google Search for brand queries.

Fully discoverable across both conventional Google Search and emerging AI-driven discovery systems.

4

Key Terms Ranked

canada, free, auctions, classifieds
— all confirmed present in live search results.

What This Means for Ezead

Ezead is not only indexed — it is **actively surfaced** across both conventional search and AI-driven discovery, positioning the platform at the forefront of next-generation search visibility.

EzeAD – Closing Investment Summary

A fully built global marketplace ecosystem ready for commercialization and scale.

INVESTMENT OPPORTUNITY

Not a Concept. It's Built.

EzeAD is not a concept or early-stage build. It is a **fully developed digital marketplace ecosystem** built over approximately **four years** with significant founder-led investment.

~4 Years

Founder-led development

Fully Operational

Platform, apps & systems live

Ready to Scale

Infrastructure complete

Infrastructure Completed

EzeAD's infrastructure is built. The opportunity is now execution and scale.

Web Platform

Fully operational web platform with multi-platform ecosystem architecture

iOS & Android Apps

Native mobile applications completed and deployed

AI & Systems

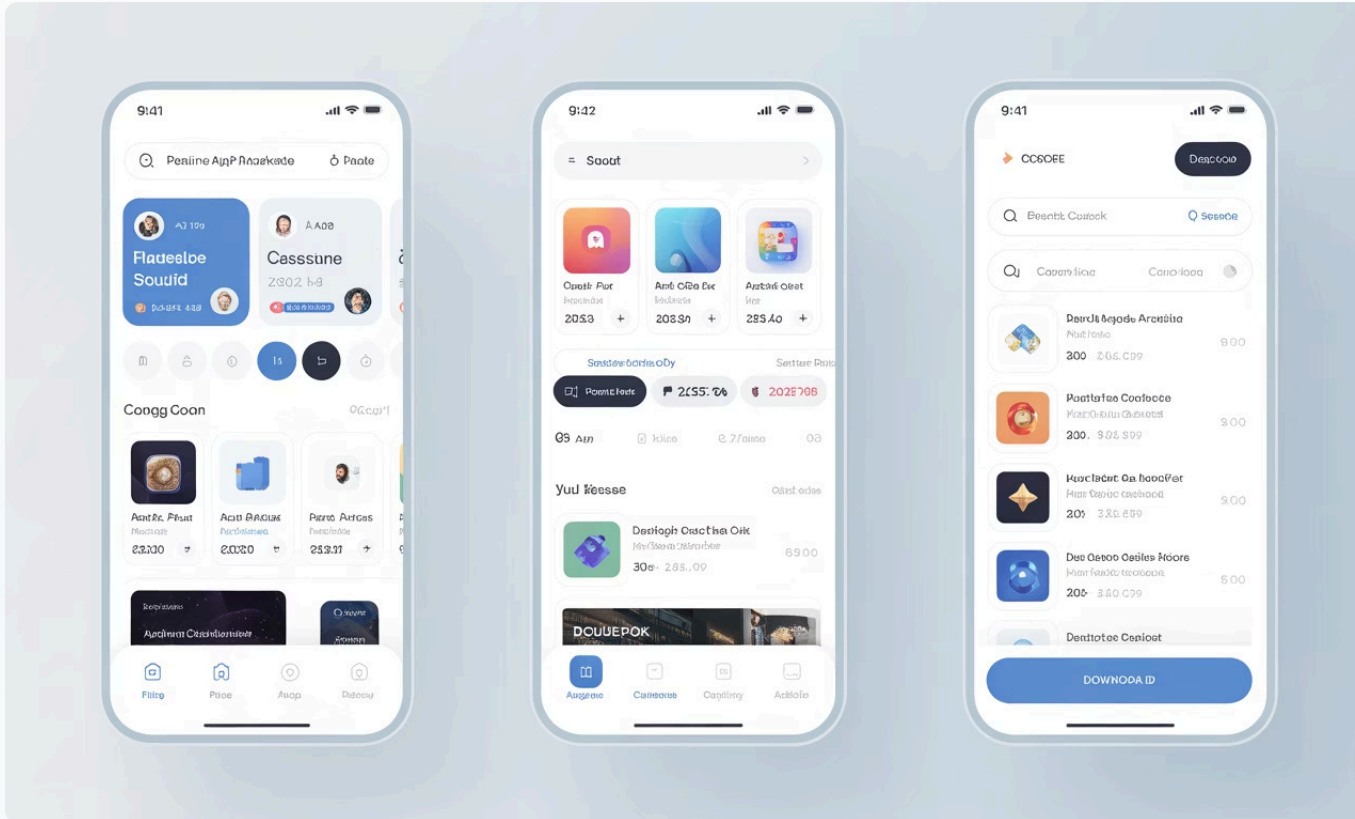

AI, messaging, moderation, and monetization systems in place

Strategic Stage

EzeAD is now positioned for the following phases of execution and scale.

The infrastructure is built. The opportunity is now execution and scale.

MOBILE PLATFORM

World-Class Marketplace System

The mobile platform is a world-class marketplace system with an estimated development value of **CAD \$300,000–\$600,000**, already completed and deployed.

Team & Operational Readiness

17+

Active Team Members

Structured development leadership
in place

25–30

Office Capacity

Staff-ready office infrastructure

4

Years of Build

Founder-led investment and
development

Capital Position

Capital is **not** required for development. It is deployed directly into:

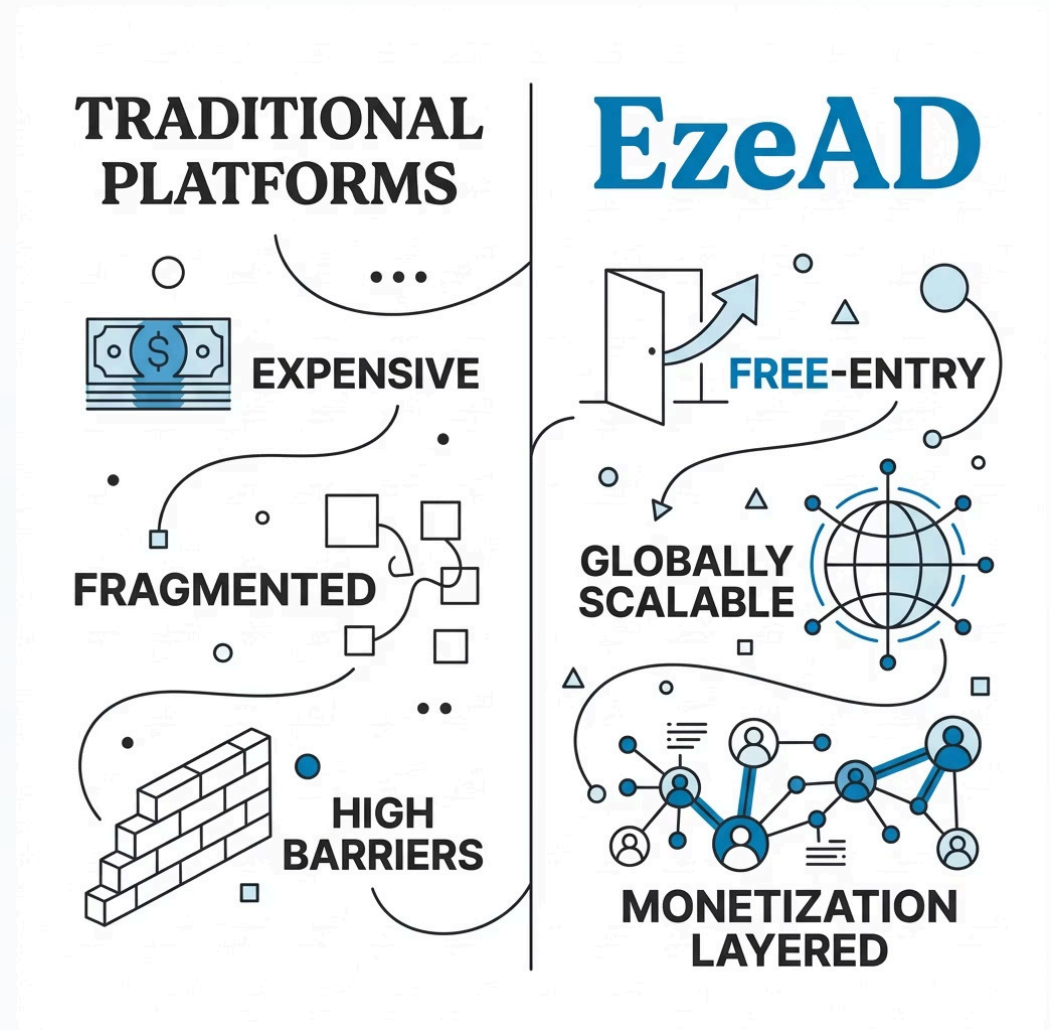

- **User Growth**
- **Market Penetration**
- **Monetization**
- **Global Expansion**

Core Principle

Capital is used to **scale**, not to build. The infrastructure is complete. Investment goes directly toward user growth, market penetration, monetization, and global expansion.

Market Position

EzeAD addresses the failure of expensive, fragmented marketplace platforms by offering a **free-entry, globally scalable ecosystem** with monetization layered on visibility and performance.

The Opportunity Is Now

EzeAD is raising capital to **activate and scale** a global marketplace infrastructure that is already built.

Built

Platform, apps & systems complete

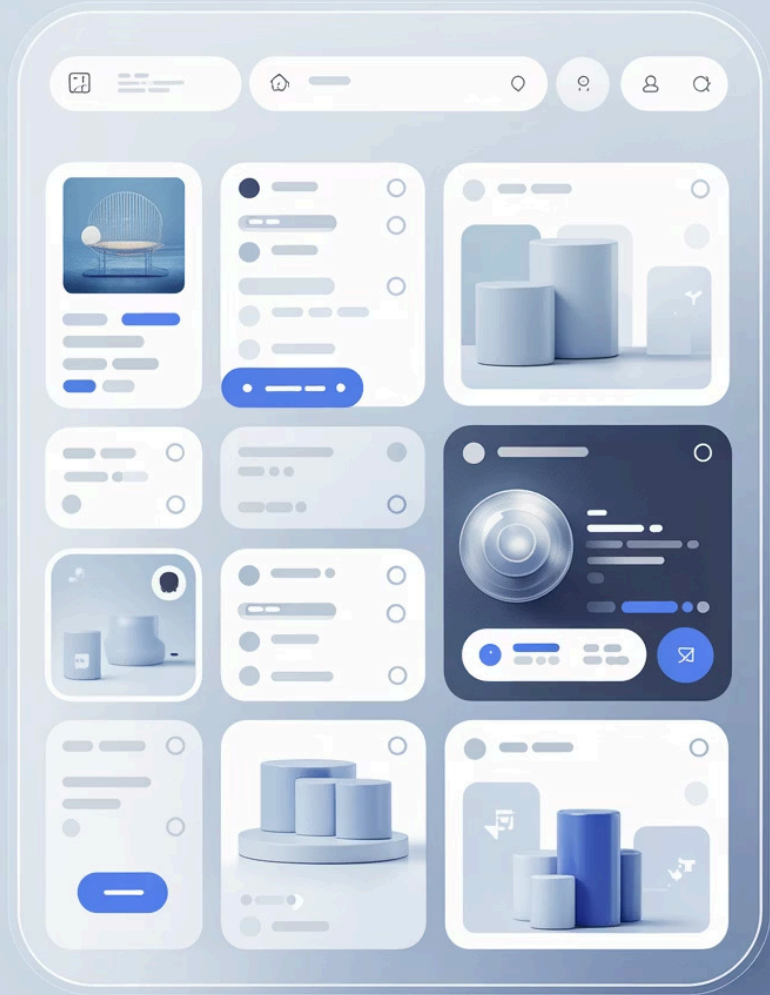

Staffed

17+ team, scalable office

Ready

Capital deployed to scale, not build

EzeAD – Why Invest Now

A marketplace platform built for scale — and the moment to move is here.

TIMING

Platform Complete. Launch Phase Begins.

EzeAD has finished development and is now entering its launch phase. The infrastructure is built, tested, and ready. This is the critical window where early capital has the greatest impact — before user growth accelerates and valuation multiples expand.

RISK

Product Risk Eliminated

The most dangerous phase of any startup — building the product — is complete. EzeAD's platform is fully operational, removing the primary execution risk that concerns early-stage investors. Capital deployed now goes toward growth, not development.

LEVERAGE

Capital Converts Directly Into Growth

Immediate Deployment

No build time required — every dollar goes straight to user acquisition and market expansion.

Compounding Returns

Growth investments in a live marketplace compound as network effects take hold.

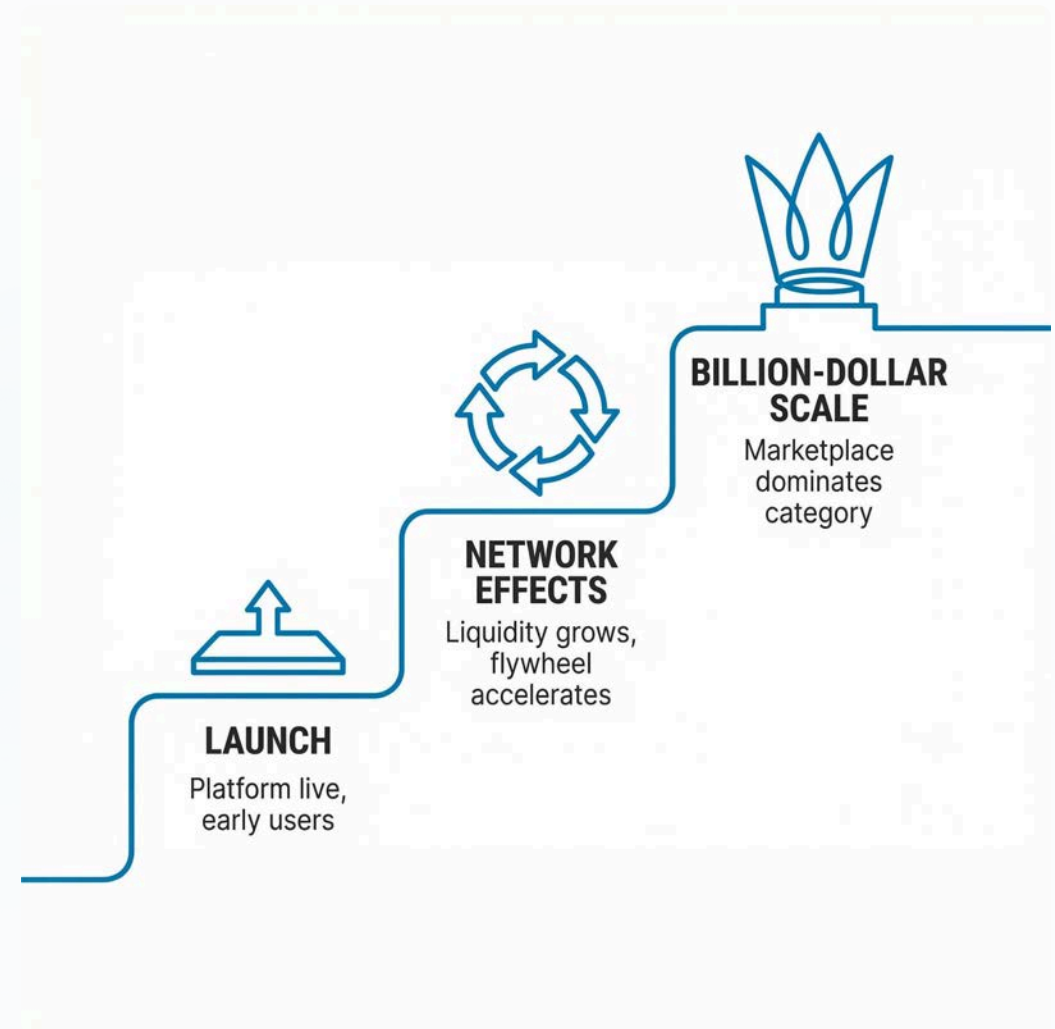

Focused Capital Use

With product risk gone, capital is deployed with precision toward measurable growth milestones.

Marketplace Models Scale to Billion-Dollar Valuations

Marketplace businesses are among the highest-performing asset classes in tech. Once liquidity and network effects are established, valuations expand rapidly — often reaching billion-dollar outcomes. EzeAD is positioned to capture this trajectory.

The Investment Case in Summary

Timing

Platform complete — entering launch phase now.

Risk

Product risk eliminated. Infrastructure is live.

Leverage

Capital converts directly into growth, not development.

Upside

Marketplace models scale to billion-dollar valuations.
